Four very badly abraded shards of what appears to be Scottish post medieval oxidised wares. The fabric is smooth with abundant fine mica; extremely difficult to date, possibly 17<sup>th</sup> century. One shard shows evidence of incised decoration similar to that seen on the shoulders of many Scottish post medieval reduced ware jugs.

Derek Hall and the author when visiting High Morlaggan were shown a small rim shard from a medieval jar/cooking pot, which we suggested was probably of 14<sup>th</sup> century date. This shard has been mislaid, but a photograph taken, (see left), shows it to have a sandy fabric.
